Sony Alpha A5000 Mirrorless Digital Camera With 16-50mm Lens

Rs.48,500

Description:

Sony Alpha a5000 Mirrorless Digital Camera with 16-50mm Lens Price & Specs

- 20.1MP Exmor APS HD APS-C CMOS Sensor
- BIONZ X Image Processor
- 3.0" 460.8k-Dot Tilting LCD Monitor
- Full HD 1080 Video at 60i & 24p
- Built-In Wi-Fi Connectivity with NFC
- Hand-Held Twilight Mode and ISO 16000
- 25-Point Contrast Detection Autofocus
- Continuous Shooting up to 3.5 fps
- Photo Creativity and Picture Effects
- Sony 16-50mm f/3.5-5.6 OSS Zoom Lens

DESCRIPTION:

The black Sony Alpha a5000 Mirrorless Digital Camera is a versatile and compact mirrorless camera that features a 20.1 megapixel APS-C-sized Exmor APS HD CMOS sensor and BIONZ X image processor to produce high-resolution still images and Full HD movies with marked low-light quality and sensitivity to ISO 16000. The image processor contributes greatly to minimizing overall noise levels and also affords a wealth of speed throughout the camera for recording up to 3.5 fps in Speed Priority Continuous mode.

To support live view monitoring, image playback, and menu navigation, a 3.0" 460.8k-dot LCD monitor is integrated into the a5000 and utilizes a 180° tilting design to better serve working from low viewing angles as well as in front of the camera. The large screen and intuitive menu interface helps to easily access a host of camera features, including Picture

Effects, Auto HDR mode, Auto Object Framing, and for connecting to mobile devices using built-in wireless and NFC connectivity.

Included with the camera body is a Sony E-mount 16-50mm f/3.5-5.6 OSS Retractable Zoom Lens, which provides a 35mm-equivalent focal length range of 24-75mm. This range of perspectives is well-suited to everyday shooting and is further enhanced through the inclusion of Optical SteadyShot image stabilization for minimizing the appearance of camera shake. Power Zoom technology allows for electronic control over the zoom position and the inclusion of one extra-low dispersion element and four aspherical elements helps to reduce chromatic aberrations throughout the zoom range as well as contribute to high overall sharpness.

20.1MP Exmor APS HD CMOS Sensor and BIONZ X Image Processor

The 20.1MP APS-C-sized Exmor APS HD CMOS sensor and BIONZ X image processor work together to produce high resolution, well-detailed imagery with minimal noise and notable low-light quality and sensitivity to ISO 16000. The processor also contributes to providing a wealth of speed throughout the camera system, including a fast 25-point contrast-detection AF system, top continuous shooting rate of 3.5 fps, and Full HD 1080i/p video recording in multiple frame rates.

Full HD Video Recording

Full HD 1080 video recording is supported at both 60i and 24p frame rates to produce high resolution movies with a smooth, cinematic look. Videos are recorded using the high-quality AVCHD codec and a built-in stereo microphone records sound in the Dolby Digital AC-3 format. Additionally, 1440 x 1080p, 1280 x 720p, and 640 x 480p formats are also supported in the Internet-friendly MP4 format.

Built-In Wi-Fi Connectivity

Built-in Wi-Fi connectivity enables the a5000 to instantly share imagery to mobile devices for direct sharing online to social networking, via email, and to cloud storage sites. NFC (Near Field Communication) is also supported, which allows for one-touch connection between the camera and compatible mobile devices; no complex set-up is required.

Tilting LCD Monitor

For live view monitoring, image playback and review, and menu navigation, a 3.0" 460.8k-dot LCD monitor is integrated into the camera body and features a 180° tilting design to promote easier use from low angles as well as in front of the camera.

Sony 16-50mm f/3.5-5.6 OSS Retractable Zoom Lens

The included 16-50mm f/3.5-5.6 OSS Retractable Zoom Lens provides a 35mm-equivalent focal length range of 24-75mm, covering wide-angle to portrait-length perspectives to suit working in a wide variety of situations. It features Optical SteadyShot image stabilization to help minimize the appearance of camera shake by up to four shutter speed steps to greatly benefit working in low-light conditions and with greater zoom magnifications. One extra-low dispersion element and four aspherical elements are integrated into the optical construction to help reduce chromatic aberrations as well as increase clarity, sharpness, and contrast and the Power Zoom electronically-driven zoom mechanism brings greater efficiency to controlling the zoom position of the lens.

Other Camera Features

A built-in pop-up flash is available to provide additional illumination when working in dim lighting.

Auto Object Framing is an intelligent shooting mode that can automatically analyze the scene and subjects within it and determine an aesthetically-pleasing composition. The subsequent imagery will be cropped according to subject matter, resulting in a well-balanced composition that utilizes Face Detection and Tracking Focus to ensure high image quality and sharpness.

Picture Effect modes allow you to apply creative settings and emphasize certain facets of individual images for a richer, more aesthetic picture quality. Posterization (Color/B&W), Pop Color, Retro Photo, Partial Color (R/G/B/Y), High Contrast Monochrome, Toy Camera, Soft High-Key, Soft Focus, HDR Painting, Rich-Tone Monochrome, Miniature, Watercolor, and Illustration modes are available.

The Photo Creativity feature provides quick access to Picture Effects as well as dedicated controls for adjusting Background Defocus, Brightness, Color, and Vividness. Additionally, these effects can be combined for nearly limitless adjustment options

Superior Auto mode is an intelligent automated setting that can quickly identify the current shooting environment and adjust crucial camera settings to deliver optimized results. This mode also utilizes Auto HDR and Hand-held Twilight modes, which employ image compositing techniques to better handle difficult lighting conditions.

Anti-Motion Blur automatically corrects for subject movement in order to deliver clean, sharp imagery in low-light conditions. This is accomplished by recording six sequential frames and compositing portions of each image to ensure overall sharpness.

Hand-held Twilight Mode automatically composites details from six sequentially-recorded images in order to attain higher overall image sharpness when working in low-light conditions.

Face Detection/Smile Shutter can detect and base focus, white balance, and exposure settings on recognized faces. This technology also enables the shutter to be released, based on three sensitivity levels, when a smile is detected in the frame.

Creative Style settings provide control over how the camera processes images based on six different predetermined styles: Standard, Vivid, Portrait, Landscape, Sunset, and B&W. Within these settings, contrast, saturation, and sharpness can also be adjusted depending on personal preference.

The Sony E-mount affords compatibility with an extensive number of lenses and lens adapters.

Convenient USB charging allows you to charge the included lithium-ion battery in-camera via USB connection from either an AC outlet or PC source.

The Stamina battery power allows up to approximately 420 shots to be taken on a single charge. The InfoLITHIUM batteries also enable you to see the remaining percentage of battery power left.

PlayMemories Home software is pre-installed on the camera for automatic downloading to a PC when connected to offer support for viewing, organizing, editing, retouching, printing, and sharing imagery.
