Aputure White Translucent Umbrella For Light Storm LS120 COB

Rs.4,942

Description:

Aputure White Translucent Light Storm Umbrella LS120 COB Price & Specs

- ***White Fiberglass Spokes***
- ***8mm Shaft***

DESCRIPTION:

This White Translucent Umbrella for Light Storm COB120t LED Light from Aputure is a 33" light modifier that softens the output and minimizes shadows while wrapping around the subject for a flattering effect. The umbrella has white fiberglass spokes to mitigate their appearance in your image and an 8mm shaft. Since the white fabric has no black backing, you can either use it in the traditional bounce mode, or turn it around and pump the light through it to light your subject in "shoot through" mode.
