DESCRIPTION:

The EOS 700D is powered by a Canon-designed and manufactured 18.0MP APS-C Hybrid CMOS sensor and DiG!C 5 image processor, which combine to deliver outstanding levels of resolution -- producing images that are consistently rich in detail and color.The Hybrid CMOS AF system in the EOS 700D allow for continuous AF constantly tracking subjects during shooting. Additionally, Video Snapshot mode makes it easy to capture and edit short video clips to bring to life an exciting day, such as road trips and weddings. Thanks to Canon's new Stepping Motor (STM) technology, , the AF system remains silent, helping ensure users only capture the sound of the scene being recorded.
