GoPro HERO5 Session

Rs.29,900

Description:

GoPro HERO5 Session Price & Specs

- Supports 4K, 2.7K, 1440p, 1080p Video
- Capture 10MP Photos at 30 fps
- Ultra Wide Angle Glass Lens
- Waterproof to 33'
- Voice Control
- Wi-Fi for Remote Monitoring and Control
- Interval Capture for Time Lapse
- Linear Mode Corrects Distortion
- Flat and Curved Adhesive Mounts Included

DESCRIPTION:

While it may be small in stature, the **GoPro HERO5** Session action camera more than makes up for it in functionality and features. Retaining the familiar ice-cube-sized form factor of the previous generation HERO Session, the HERO5 Session ups the ante in a major way. UHD 4K video at 30fps and 1080p video at 90fps in addition to 10MP photos at bursts of up to 30fps are all packed inside the diminutive rectangular prism of a camera. The camera body itself is waterproof to depths of 33' and is shock-resistant, so even without a protective housing, the HERO5 Session can take a licking.

Whether you want to clamp the HERO5 Session to a guitar headstock, boom it out on a selfie stick, or mount it to your surfboard, you will have all of GoPro's separately available 3-pronged accessories to help get your shot. The included Standard Frame has an integrated accessory mount for securing accessories. To get you started, a mounting buckle quick-release for the Standard Frame and two adhesive mounts (one curved and one straight) with quick-releases are included.

While more functionality has been integrated, the HERO5 Session is still easy to use. The one-button interface, featured on the previous generation HERO Session, will be instantly familiar for accessing menu functions. If the camera is off, pressing the record button will power it on and immediately start recording. Hands-free control is also possible using the built-in Voice Control feature or the free mobile app. Speaking simple voice commands can control various functions inside the camera, including start/stop video recording, photo burst, and more.

Quick Features

Photos: Up to 10MP, 30fps burst, time lapse mode

Videos: Up to 30fps in UHD 4K, up to 60fps in 1440p, up to 90fps in 1080p

Waterproof to 33'

Simple one-button control

Wi-Fi and Bluetooth connectivity

Advanced wind-noise reduction

Voice control

Digital video stabilization

Automatic upload to the cloud

Video Recording Modes

Select the desired resolution to fit your project. Record in UHD 4K resolution up to 30fps or switch to lower resolutions such as 1080p and 720p for access to higher frame rates, more FOV (Field Of View) options, and electronic stabilization. In 2.7K widescreen and lower resolutions, for instance, narrower FOV options open up, including Medium, Narrow, and the new Linear mode (only available in 2.7K and 1080p settings), which corrects the lens's barrel distortion.

All video recording modes can be as simple or advanced as you want them to be. If you only want to ensure that a shot is captured, auto-exposure is at your disposal. For those who are shooting less off-the-cuff footage and want complete control, manual control of exposure is also available.

The HERO5 Session will always try to record the best audio quality possible. Using internal algorithms, the HERO5 Session can reduce artifacts from wind noise, making audio quality more acceptable, even in extreme circumstances.

Photo Modes

Burst Mode: Bursts of photos can be taken during high-action sequences to ensure that you capture the moment. The camera's buffer can fit up to 30 photos from a single burst, and burst durations can be set from six seconds to one second, effectively offering a 30fps burst of 10MP photos.

Time Lapse Mode: Record clouds floating by, traffic snaking through cityscapes, or stars and constellations tracing their way across the sky with the time lapse mode. Set your interval from a picture every 1/2 second to every minute for different effects.

GoPro Apps

GoPro apps Capture and Quik allow you to access and edit your GoPro footage with simple to use yet powerful functions. There's also GoPro Plus, which lets you access your GoPro content on the cloud.

GoPro Capture (iOS/Android)

Use your iOS or Android device to live-preview and play back shots, control your GoPro, and share on the fly.

- Live preview makes it easy to frame the perfect shot

- Get full remote control of all camera functions

- Share photos and videos to Instagram, Facebook, Twitter and more

GoPro Quik (iOS/Android)

Edit videos with just a few taps.

- Analyze your photos and video clips to find great moments

- Adds transitions and effects, and sync everything to the beat of the music

- Customize your story with text, filters, music, and more

GoPro Quik | Desktop (Mac/Windows)

Import and edit your videos with just a few clicks.

- Transform your footage into edited videos synced to music

- Automatically import your photos and videos and share your best shots

- Comes bundled with GoPro Studio for more advanced editing

GoPro Plus (Cloud-Subscription)

Access your GoPro footage wherever you are, and create and share your story.

- Auto upload to the cloud

- Access your footage in the cloud, then use Quik to edit on your phone or computer

- Enjoy your photos and videos from your phone or TV using the optional AirPlay and Apple TV

- Unlock an expanded library of soundtracks for your footage
