GoPro Hero 9 Black

Rs.69,000

Description:

GoPro Hero 9 Price & Specs

Hitting The Ultimate Edge

GoPro hero 9 in Pakistan comes with Hyper Smooth stabilization with 5K video quality, 20MP pump up still image capacity to capture the refined images. The long-lasting battery gives longer operational hours to capture time-lapse, pictures, videos and more.

Dual Screen For Better Preview

Despite multiple similarities with Gopro hero 8, the latest version comes with a surprise of dual screen. The rare screen is 2.27inch with almost 16% of increment while the front display comes in 1.4inch. The dual-screen gives a little thickness to the overall camera but not too much.

Capture What You See

With all high-resolution features, Gopro hero 9 is good enough to capture landscapes, Ariel views, time laps, pictures and even night times. It gives amazing low light capturing experience with the best quality and not grain.

Removable Lenses Protector

Gopro hero 9 brings you the opportunity to use a party ND filter on the lenses. Removable lenses protector enable you to add and remove filters and protectors easily.

Rugged And Waterproof

Just like its tradition, Gopro hero 9 is tough in tough conditions and survives water threats easily. Take it anywhere with you without any fear of damage or failure. It can survive up to 33ft or 10m of water, that is enough to justify **Gopro hero 9 price in pakistan**.

Ultimate Travel Case

You will not get the conventional thick transparent plastic case, but the soft travel case. It keeps the weight minimum and secure the camera body sides as well.

The new GoPro will feature a sensor capable of taking 20 MP stills and video at 5k 30 fps. It will also be able to shoot in slow-motion at up to 240 fps or 8x. The Hero 9 will feature voice control and is waterproof down to 33 feet. GoPro Hero 9 will feature the improved HyperSmooth 3.0, which will allow for even smoother footage than previous GoPros. Once again, the GoPro Hero 9 will take RAW and HDR photos.

Of course, the Hero 9 Black will feature the rear touch screen and the brand new front display for easy framing and vlog-style recording. The GoPro will come with the new TimeWarp 3.0 — an improvement over 2.0 — and with webcam mode right out of the box. You will also be able to live stream from the camera at 1080p.

The GoPro Hero 9 Black will feature a 1720mAh battery, which is almost 41% larger than the current battery found in the GoPro Hero 8 Black at 1220mAh. Hopefully, this means a slight increase in battery life but is likely for the 20 MP capable sensor. An additional charger can be bought to charge the batteries and is rumored to have some sort of quick charge capability.

Key Features

- 5k Recording with 30fps
- Super Slowmo
- Hyper smooth 3.0
- 41% Longer Battery
- 20MP Capable Sensor
