World-wide COMPUTER EDUCATION

1st Semester Project

# FOTOLAB

| *PROJECT TITLE* | *MENTOR* |
| --- | --- |
| *FOTOLAB* | MISS FATIMA |

# ACKNOWLEDGEMENT

We are Thankful to **ALMIGHTY ALLAH** that by HIS Grace we have been successful. We are presenting our Project we have tried our best to take all relevant and necessary topics into our consideration so that this project may become comprehensive.

This is our **1st Semester**. We have strived for a better outlook to come. This project has been developed in **Visual Studio Code using HTML, CSS & JavaScript**. We have been assigned to make a website namely as our Cpism Project. We tried to observe the coding and its layout in Visual Studio Code. We find it easy to utilize the editor.

We would like to thank Our Faculty, **Miss Fatima** for her Great Guidance And helping us Learn These Languages.

We also express our sincere gratitude to E-Project team from **APTECH CLIFTON CENTER**, for their valuable guidance and support for the completion of this project.

We earnestly hope that this project will provide all the necessary information required by the user to fulfill his/her inspiration. However, suggestion and feedbacks for improvements will be thankfully welcomed & acknowledged.

**Thank You**

# Introduction

The thirst for learning, upgrading technical skills and applying the concepts in real life environment at a fast pace is what the industry demands from IT professionals today. However busy work schedules, far-flung locations, unavailability of convenient time-slots pose as major barriers when it comes to applying the concepts into realism. And hence the need to look out for alternative means of implementation in the form of laddered approach.

The above truly pose as constraints especially for our students too! With their busy schedules, it is indeed difficult for our students to keep up with the genuine and constant need for integrated application which can be seen live especially so in the field of IT education where technology can change on the spur of a moment. *Well, technology does come to our rescue at such times!!*

Keeping the above in mind and in tune with our constant endeavour to use Technology in our training model, we at Aptech have thought of revolutionizing the way our students learn and implement the concepts using tools themselves by providing a *live and synchronous eProject learning environment!*

# PROBLEM STATEMENT

***FOTOLAB*** was established in 1991 with the objective of providing sales service for Digital Camera, SLR Camera, Handycam, their accessories and all other related products.

They allot top priority to innovation & upgradation of technology in the avenues of Distribution of All kinds and brands of Digital Camera and their related accessories.

The customers get the benefit of Undivided Attention, Expert Analysis, Innovative Ideas, Commitment and Comprehensive Hardware & Software Solution.

You are supposed to create a website for them with the below mentioned requirement specifications.

The website is to be developed for the Windows Platform using HTML5, JavaScript and Geolocation. The site should work well in all leading browsers including Chrome, IE, Firefox etc.

**Requirement Specification:**

The Web site is to be created based on the following requirements.

1. The Home Page should be created making use of Sections with a suitable logo, the header section can be added which will show images of related products.
2. The site must contain the links to navigate through any category for the information.
3. The site should display a menu which will have categories of all products.
   Few products expected to be included are mentioned below, however more can be added.

    - Cameras: all types of cameras should be included
    - Camera lenses : varieties of lenses to be included
    - Pro audio: related audio accessories options to be included
    - Memory cards & media : related products
    - Tripods & supports
    - Lighting & Studio

- Camera bags & cases
- Miscellaneous accessories

4. The site should contain the options for brief introduction about the various products available, location of the shop and any other information if required.
5. The information should be categorized according to the brand names of the products like if a User wants to see only "yashica" cameras or any other company products then he/she can click on a Link/button/menu etc and can see only that Brand products.
6. When a user selects any particular brand, a list of products for that brand will be displayed
7. A brief summary of features of the respective item should be displayed on the Web Page along with the picture but detailed Features should be stored in Individual Word documents which can be downloaded or viewed by the User who wishes to see the same.
8. The user should also be able to compare the various products of different as well as similar brands.

There should be a "Contact Us" page which will have the Address of the Company which should be displayed using GeoLocation API (eg. GoogleMaps) and the email address which when clicked will invoke the local mail client from where they can send an email.

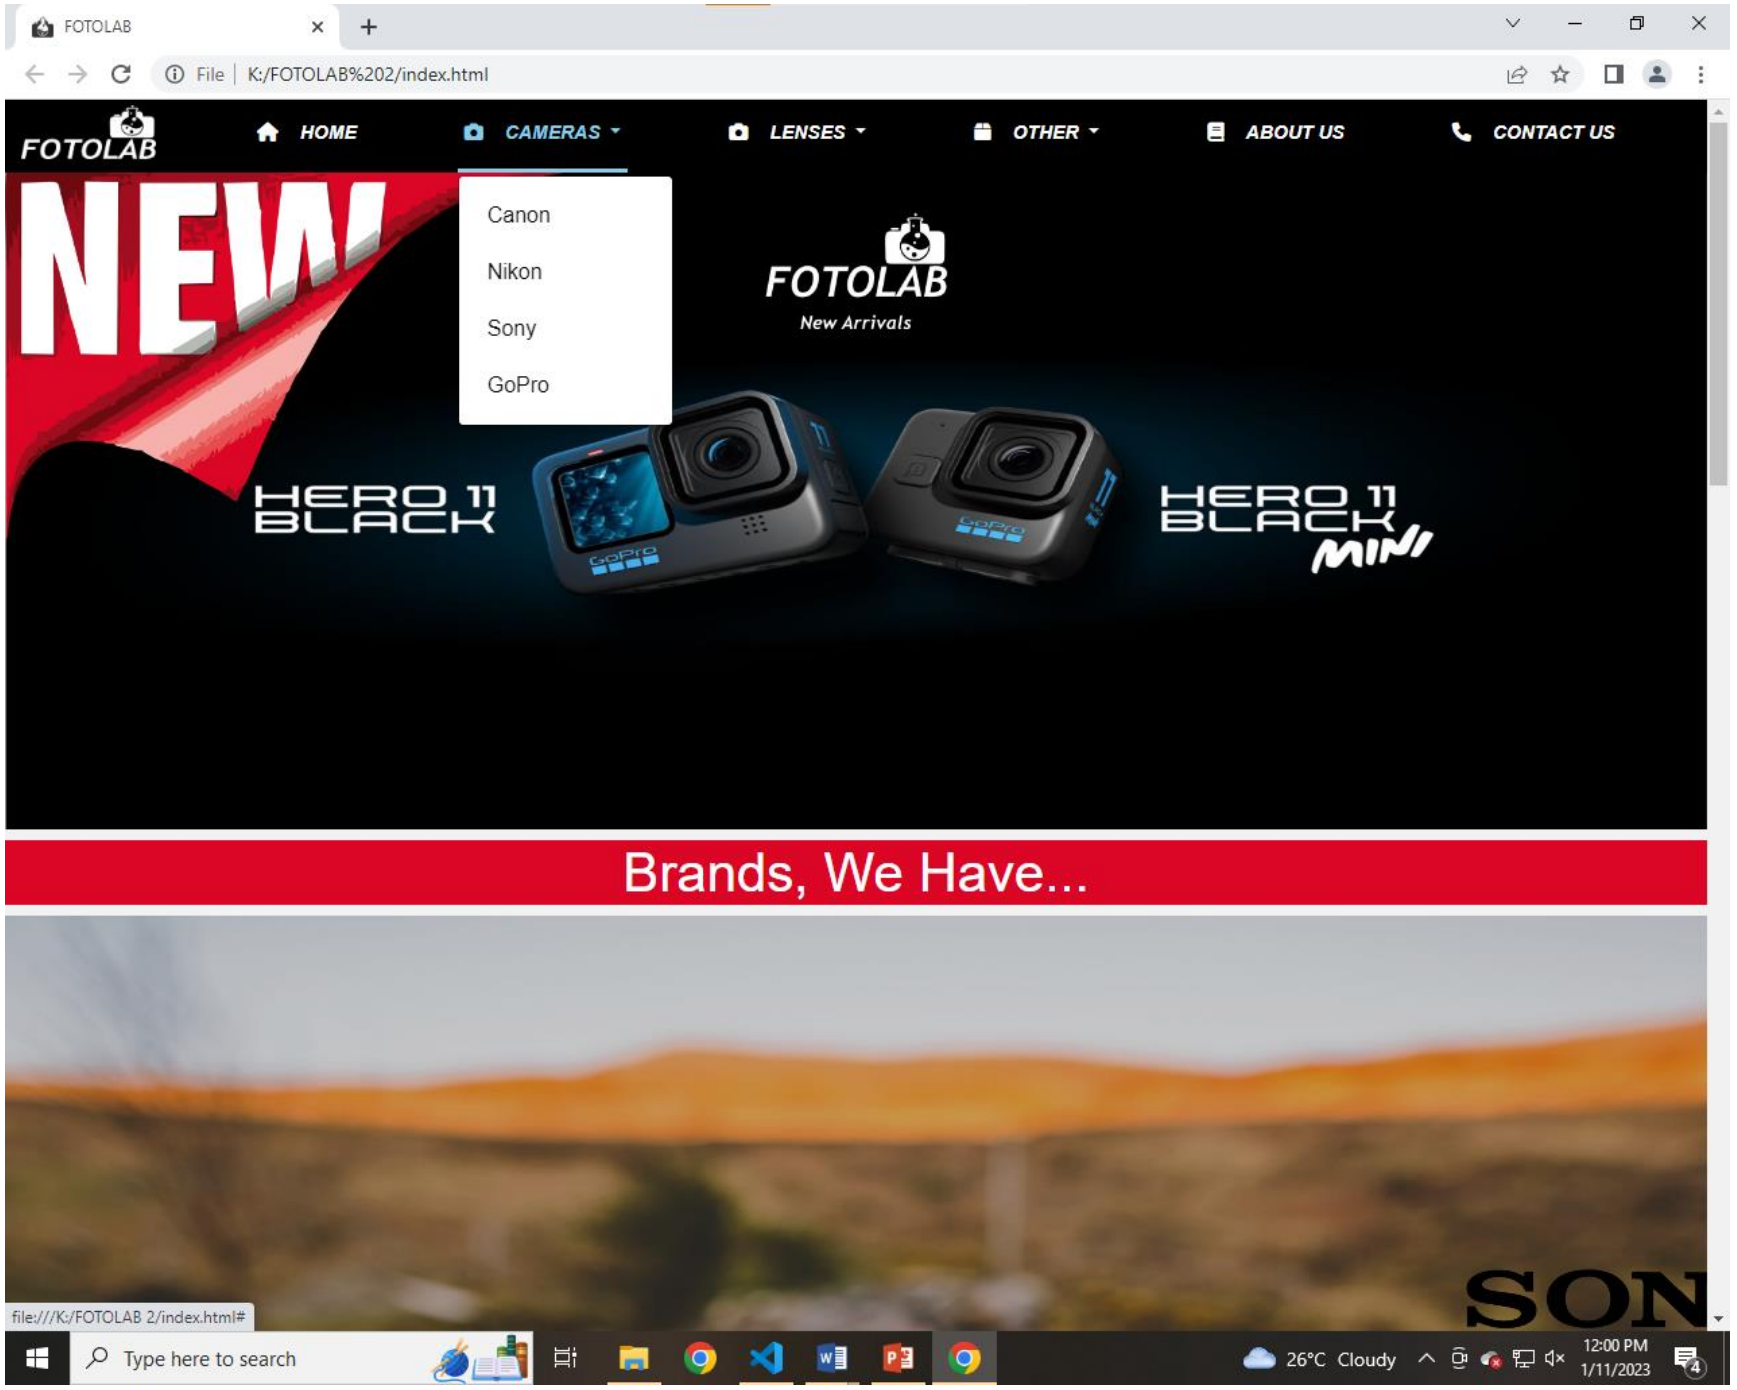

# Hardware/ Software Requirements

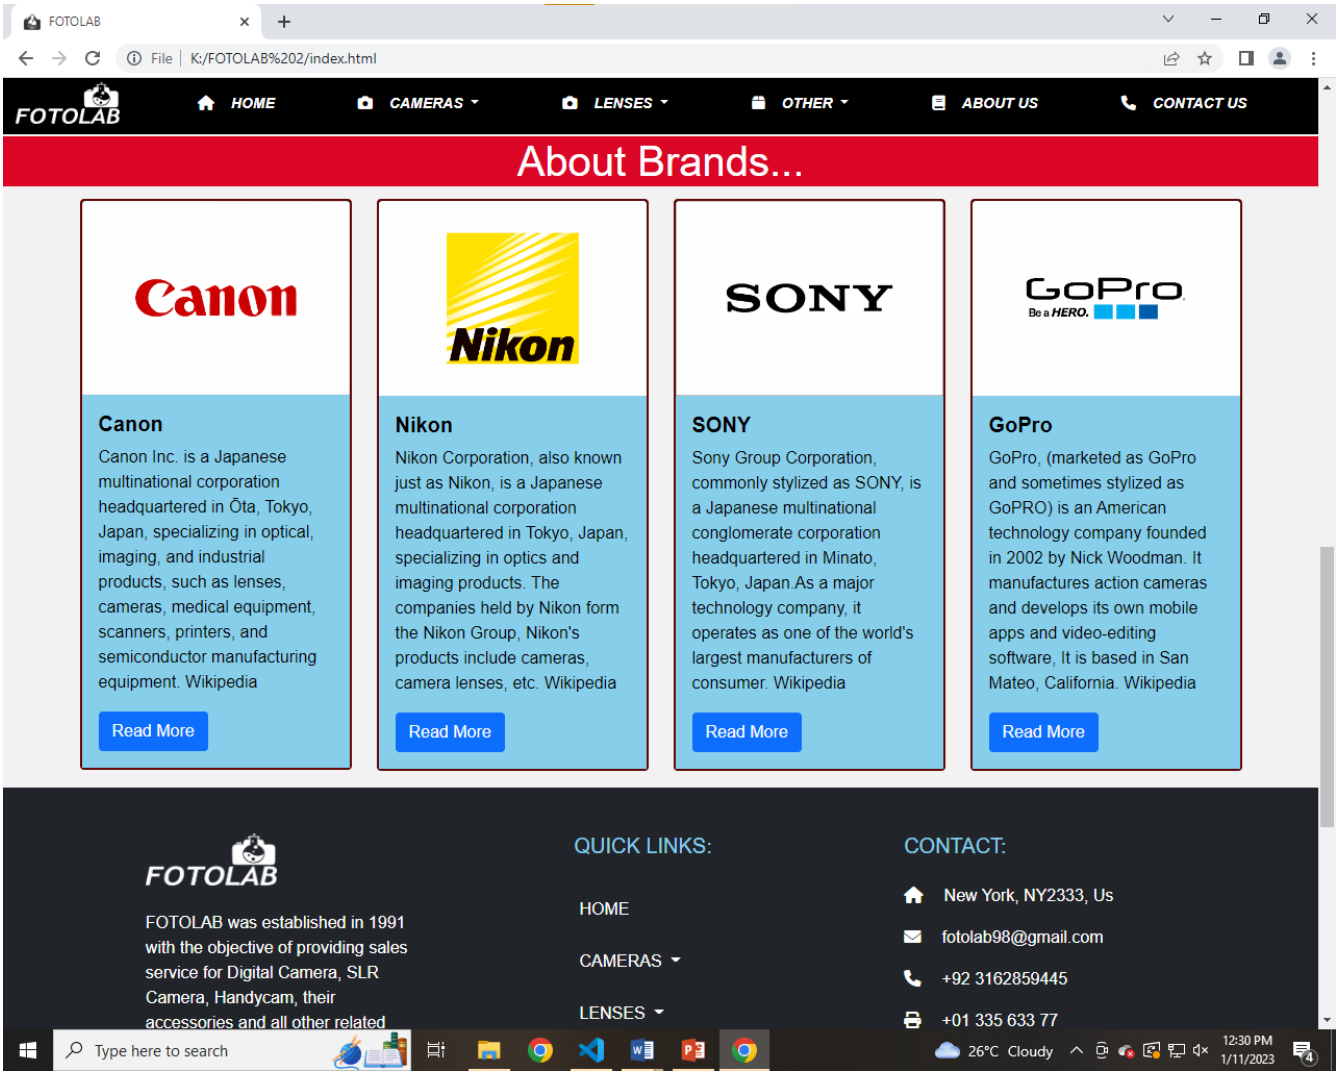

**Hardware**

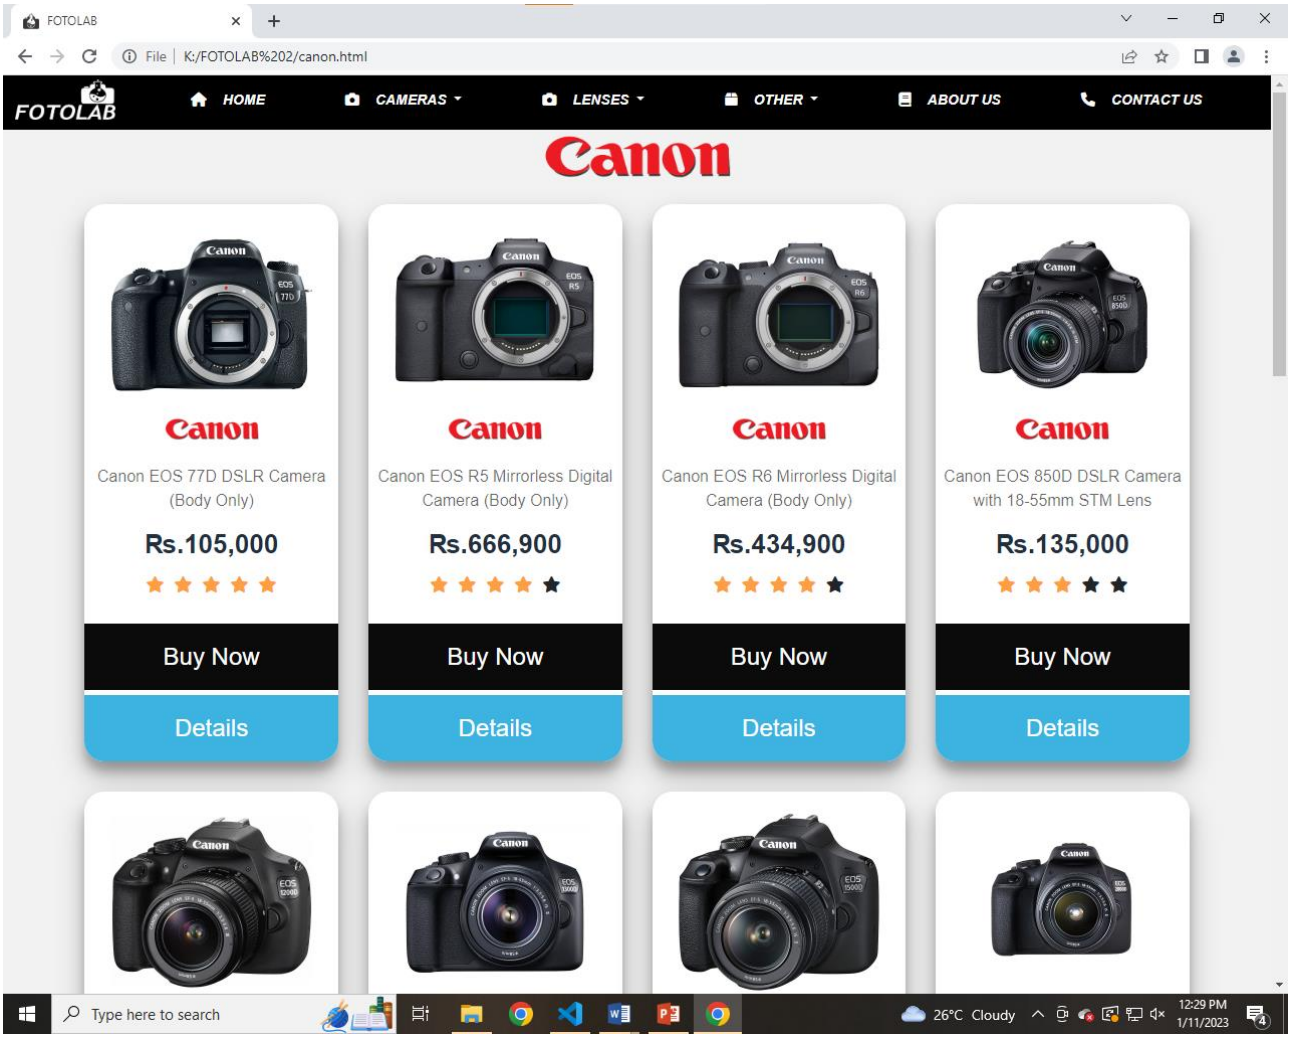

- A minimum computer system that will help you access all the tools in the courses is a Pentium 166 or better
- 64 Megabytes of RAM or better

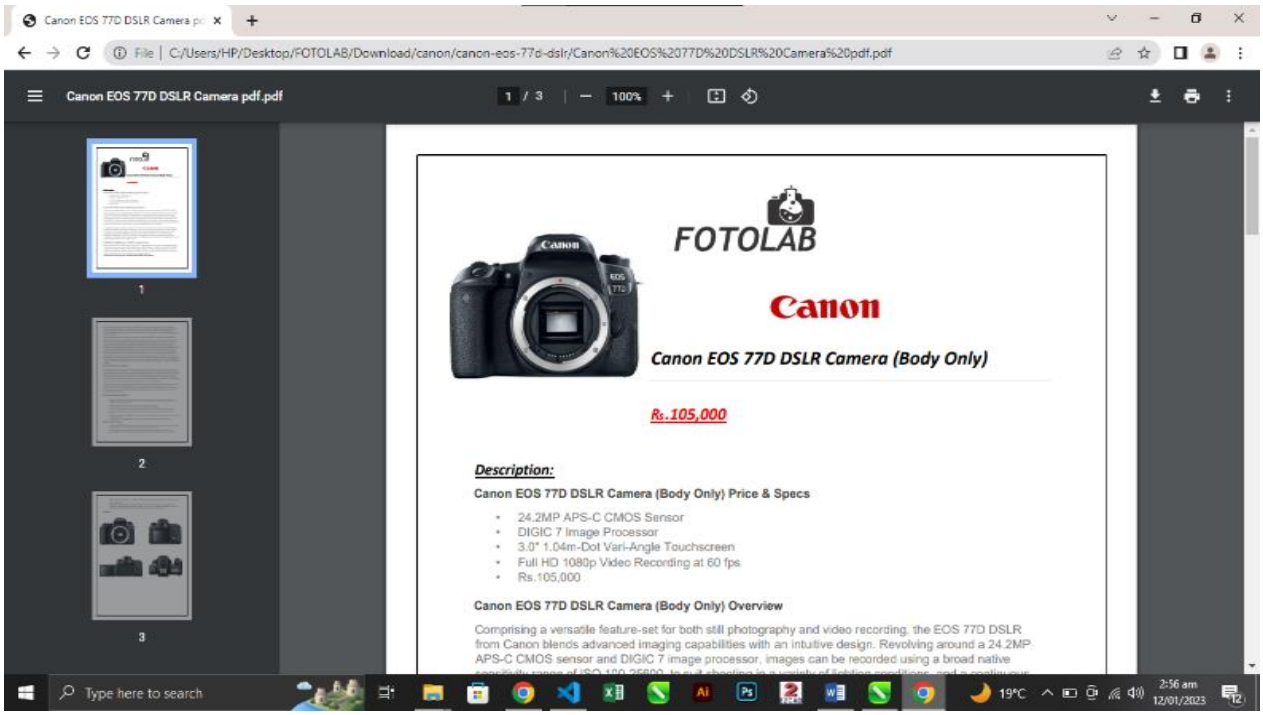

**Software**

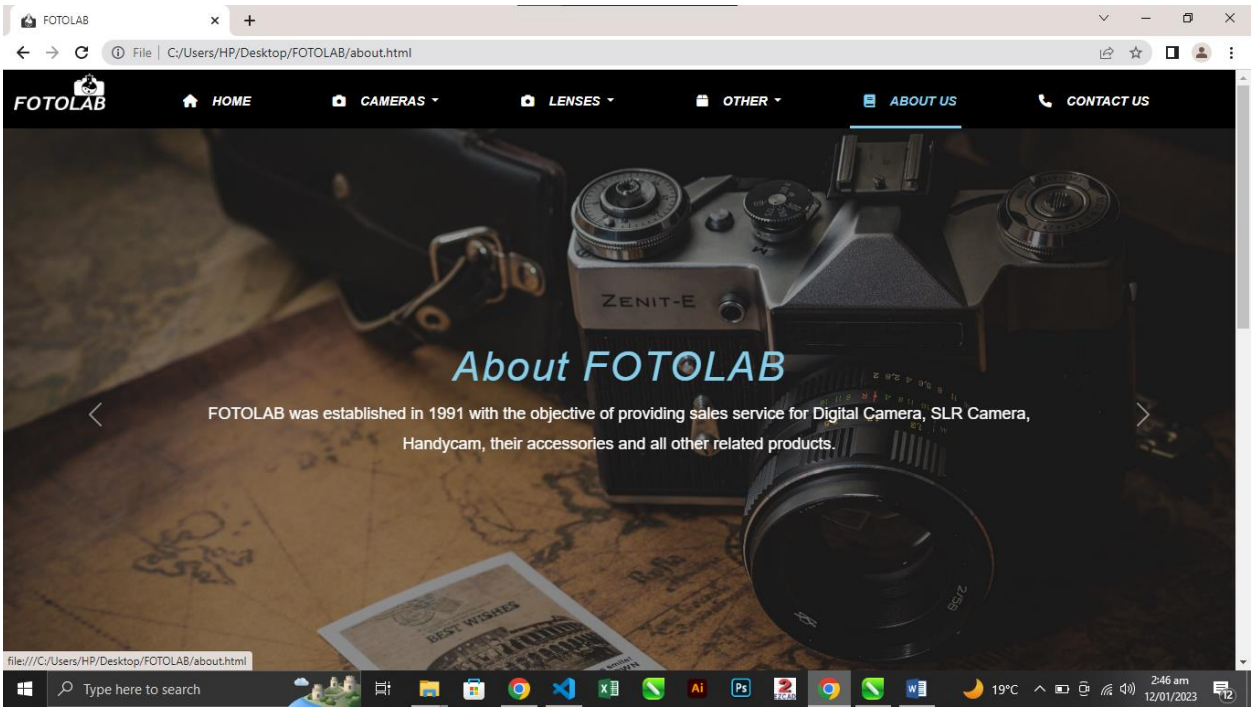

- Notepad/HTML editor
- Dreamweaver
- IE 5.0/ Netscape 6.0
